EXL Announces Automation Anywhere Partnership to Accelerate RPA

NEW YORK, April 28, 2016 (GLOBE NEWSWIRE) -- EXL (NASDAQ:EXLS), a leading provider of Operations Management and Analytics services, today announced a strategic partnership with Automation Anywhere, a global leader in Robotic Process Automation (RPA), to increase EXL's Advanced Automation and Robotics suite of solutions.

"Robotics is becoming an exciting capability in our evolving solution suite to help clients further digitize their business operations," said Rohit Kapoor, Vice Chairman and Chief Executive Officer, EXL. "We are continuing to invest significantly in our advanced automation and robotics capabilities. The partnership with Automation Anywhere combines their global enterprise-grade strength with our industry expertise to accelerate the value we bring to our clients."

"Our partnership with Automation Anywhere will add greater transformational capabilities to our growing suite of advanced, technology-embedded solutions," said Baljinder Singh, Senior Vice President and Chief Information Officer, EXL. "The non-intrusive Automation Anywhere platform will complement EXL's proprietary technology, simplify integrations with clients, foster outcome-based engagement models and create differentiated, industry-specific solutions."

RPA is playing an increasingly critical role in business processes by automating manual, repetitive tasks. RPA dramatically increases process efficiency and speed with near-zero error rates without changing the underlying IT infrastructure.

"The combination of Automation Anywhere's industry-leading RPA platform and the business operations, analytics and industry expertise at EXL will create unparalleled value by increasing the speed and accuracy of business processes in any industry vertical," said Mihir Shukla, CEO of Automation Anywhere. "We're very excited to be partnering with EXL as enterprises around the world continue their rapid adoption of this technology."

About Automation Anywhere

At Automation Anywhere, we believe that people who have time to create, think, and discover build great companies. That's why we've dedicated the last decade to driving the adoption of robotic process automation technology in leading Financial Services, BPO, Healthcare, Technology, and Insurance companies—to name a few—across more than 90 countries. Our intelligent process robots transform the way businesses operate, delivering complex business and IT work across a range of processes including procure-to-pay, quote-to-cash, HR administration, claims processing, and thousands of other front and back office processes.
