

EXL to create enterprise-wide data and AI applications for insurance, healthcare, banking, retail and other industries using NVIDIA AI

Jul 31, 2024

NEW YORK, July 31, 2024 (GLOBE NEWSWIRE) -- EXL [NASDAQ: EXLS], a leading data analytics and digital operations and solutions company, today announced an initiative to develop and deploy production-grade AI applications in insurance, healthcare, banking, financial services, media and retail using the full-stack NVIDIA AI platform, which includes accelerated computing, networking and software.

EXL's adoption of advanced AI technologies, powered by NVIDIA AI, aims to revolutionize the provision of fast and scalable AI in complex enterprise production environments. As a leader in helping clients redesign customer journeys and reinvent business models by integrating data, analytics and AI directly into critical workflows, EXL will play a key role in fine-tuning and applying the NVIDIA AI platform to highly specialized use cases. These include GenAI-driven insights engines and smart agent assist solutions, large insurance language models, claims assist tools and several real-time GenAI initiatives currently being used in banking and financial services, media, retail and other industries.

Initial EXL applications being developed in collaboration with NVIDIA include a fine-tuned insurance LLM, which helps to improve the speed and effectiveness of claims adjudication and policy underwriting. By leveraging [NVIDIA AI Enterprise](#) software including [NVIDIA NeMo](#) and [NVIDIA NIM microservices](#), EXL can dramatically compress model development time and embed client-specific data, analytics and digital tools directly into client workflows more rapidly and cost-effectively than before. Through this collaboration, EXL will help drive significant improvements in the performance of the latest large language models, resulting in more intuitive and comprehensive solutions for enterprise customers.

"Our clients realize that business success hinges on their ability to effectively leverage data and AI to transform their operating model while always keeping their customers at the center of the design. To do this, they need access to world-class AI and data infrastructure, the best-in-class engineering and data science talent and the ability to manage change as their operating models and workflows transform," said Anand "Andy" Logani, EXL's executive vice president and chief digital officer. "The NVIDIA AI full stack platform will provide the foundation on which EXL's large data science and data engineering teams build domain-specific solutions to help customers quickly scale their success in AI."

"Industries such as insurance, healthcare and banking face challenges in adopting generative AI to enhance operations and customer experiences," said Alvin DaCosta, vice president, global consulting partner organization, NVIDIA. "With the NVIDIA AI platform and EXL's domain expertise, more customers can rapidly develop and deploy AI solutions that address industry-specific needs."

EXL will train a significant portion of its data engineering and data science team on NVIDIA's full-stack AI services to integrate NVIDIA AI into its Gen AI platform, upgrade its existing data and AI solutions and build new solutions in collaboration with NVIDIA and EXL's clients.

About ExlService Holdings, Inc.

EXL (Nasdaq: EXLS) is a leading data analytics and digital operations and solutions company. We partner with clients using a data and AI-led approach to reinvent business models, drive better business outcomes and unlock growth with speed. EXL harnesses the power of data, analytics, AI, and deep industry knowledge to transform operations for the world's leading corporations in industries including insurance, healthcare, banking and financial services, media and retail, among others. Cautionary Statement Regarding Forward-Looking Statements *This press release contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. You should not place undue reliance on those statements because they are subject to numerous uncertainties and factors relating to EXL's operations and business environment, all of which are difficult to predict and many of which are beyond EXL's control. Forward-looking statements include information concerning EXL's possible or assumed future results of operations, including descriptions of its business strategy. These statements may include words such as "may," "will," "should," "believe," "expect," "anticipate," "intend," "plan," "estimate" or similar expressions. These statements are based on assumptions that we have made in light of management's experience in the industry as well as its perceptions of historical trends, current conditions, expected future developments and other factors it believes are appropriate under the circumstances. You should understand that these statements are not guarantees of performance or results. They involve known and unknown risks, uncertainties and assumptions. Although EXL believes that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect EXL's actual financial results or results of operations and could cause actual results to differ materially from those in the forward-looking statements. These factors, which include our ability to maintain and grow client demand, our ability to hire and retain sufficiently trained employees, and our ability to accurately estimate and/or manage costs, rising interest rates, rising inflation, recessionary economic trends, and ability to successfully integrate strategic acquisitions, are discussed in more detail in EXL's filings with the Securities and Exchange Commission, including EXL's Annual Report on Form 10-K. You should keep in mind that any forward-looking statement made herein, or elsewhere, speaks only as of the date on which it is made. New risks and uncertainties come up from time to time, and it is impossible to predict these events or how they may affect EXL. EXL has no obligation to update any forward-looking statements after the date hereof, except as required by applicable law.*
