

EXL Reports 2013 Second Quarter Results

Quarterly Revenues of \$116.0 Million, Up 7% Year over Year

Adjusted Diluted Earnings Per Share (EPS) of \$0.37

NEW YORK, July 30, 2013 (GLOBE NEWSWIRE) -- ExlService Holdings, Inc. (Nasdaq:EXLS), a leading provider of outsourcing and transformation services, today announced its financial results for the second quarter of 2013.

Rohit Kapoor, Vice Chairman and CEO, commented: "As expected, our second quarter revenues were flat sequentially, despite a currency headwind and project-based spending in transformation services not picking up as much as we had expected. On a constant currency basis, our reported revenues would have been higher by \$1 million.

Since our last quarterly earnings release, the Indian rupee has depreciated 10% versus the US dollar, impacting the portion of our revenues where clients bear foreign exchange risk. Separately, delays in project-based spending and slower business ramp-ups will impact our revenue and adjusted diluted earnings per share growth this year versus our prior projections.

We are seeing continued strength in demand for our domain-focused services in insurance and healthcare. We are pleased to see that our pipeline has grown and deepened particularly in finance and accounting, with an increase in both the number and average size of deals. "

Vishal Chhibbar, CFO, commented: "In the second quarter, EXL generated revenues of \$116.0 million, up 7% year over year, driven by 10% growth in outsourcing. Excluding previously announced client transitions, constant currency revenues grew 11% year over year and 1% sequentially. Second quarter adjusted diluted earnings per share were \$0.37, up 3% year over year, as revenue growth was offset by annual wage increments and a significant expansion of our analytics team. These investments are key to sustainable long-term growth in our targeted verticals.

For 2013, we are revising our guidance for revenues to \$475 million to \$483 million, due to a \$6 million impact of foreign exchange and softer forecast growth in the second half of the year. We are revising our adjusted diluted EPS guidance to \$1.71 to \$1.79, representing year over year growth of 8% to 13%. We expect revenue growth in the second half of the year, driven by expected broad-based volume increases across our businesses."

CONDENSED CONSOLIDATED STATEMENTS OF OPERATIONS (UNAUDITED)

Reconciliation of Adjusted Financial Measures to GAAP Measures

In addition to its reported operating results in accordance with U.S. generally accepted accounting principles (GAAP), EXL has included in this release adjusted financial measures (adjusted EBITDA, adjusted net income and adjusted diluted earnings per share) that the Securities and Exchange Commission defines as "non-GAAP financial measures." The adjusted financial measures disclosed by the Company should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations from those financial statements should be carefully evaluated. The Company believes that providing these adjusted measures may help investors better understand the Company's underlying financial performance. Management also believes that these adjusted financial measures, when read in conjunction with the Company's reported results, can provide useful supplemental information for investors analyzing period to period comparisons of the Company's results and comparisons of the Company's results with the results of other companies. The Company believes that it is unreasonably difficult to provide its financial outlook in accordance with GAAP for a number of reasons including, without limitation, the Company's inability to predict its future stock-based compensation expense under ASC Topic 718 and the amortization of intangibles associated with further acquisitions. The Company also incurs significant non-cash charges for depreciation that may not be indicative of the Company's ability to generate cash flow.

Additionally, the Company provides certain information on a constant currency basis, which reflects a comparison of current period results translated at the prior period currency rates. This information is provided because the Company believes that it provides useful incremental information to investors regarding the Company's operating performance.

The following table shows the reconciliation of these adjusted financial measures from GAAP measures for the three months ended June 30, 2013 and June 30, 2012 and for the three months ended March 31, 2013:
